PROPOSED NEW CLAIMS

Please cancel claims 15, 16, 21-30.

Please add the following new claims.

35. (New) A method of making biscuits from a dough comprising flour and additional ingredients providing proteins, carbohydrates, and lipids, wherein the improvement comprises admixing the dough with at least one puroindoline;
and wherein the at least one puroindoline is added in an amount effective for increasing the firmness of the biscuits resulting from baking the dough.
36. (New) The method of claim 35 wherein the amount of puroindoline is effective to reduce the density of a hard biscuit prepared from a dough with a fat content of between 2 and 20% of the total weight of the dough.
37. (New) The method of claim 35 wherein the amount of puroindoline is effective to reduce the density of a soft biscuit prepared from a dough with a fat content of between 2 and 30% of the total weight of the dough.
38. (New) The method of claim 35 wherein the amount of puroindoline is effective to reduce the density of a puff biscuit prepared from a dough with a fat content less than or equal to 4% of the total weight of the dough.
39. (New) The method of claim 35 wherein the amount of puroindoline is effective to increase the density of a puff biscuit prepared from a dough without added emulsifier and which dough has a fat content greater than or equal to 7% of the total weight of the dough.
40. (New) A method of making biscuits from flour and additional ingredients providing proteins, carbohydrates, and lipids, wherein the improvement comprises admixing the flour with at least one puroindoline;
and wherein the at least one puroindoline is added in an amount effective for increasing the firmness of the biscuits resulting from ^{the mixture comprising said flour and additional ingredients and} baking the biscuit dough. ^{puroindoline}

41. (New) The method of claim 40 wherein the amount of puroindoline is between 0.02 and 5% by weight relative to the weight of the flour.
42. (New) The method of claim 40 wherein the flour has a puroindoline content greater than 0.2% of the dry weight of the flour with the additional ingredients.
43. (New) The method of claim 42 wherein the puroindoline content of the flour is between 0.2 and 2% of the dry weight of the flour.
44. (New) A biscuit produced by the method of claim 35.
45. (New) The biscuit of claim 44, wherein the amount of puroindoline is effective to reduce the density of a hard biscuit prepared from a dough with a fat content of between 2 and 20% of the total weight of the dough.
46. (New) The biscuit of claim 44 wherein the amount of puroindoline is effective to reduce the density of a soft biscuit prepared from a dough with a fat content of between 2 and 30% of the total weight of the dough.
47. (New) The biscuit of claim 44 wherein the amount of puroindoline is effective to reduce the density of a puff biscuit prepared from a dough with a fat content less than or equal to 4% of the total weight of the dough.
48. (New) The biscuit of claim 44 wherein the amount of puroindoline is effective to increase the density of a puff biscuit prepared from a dough without added emulsifier and which dough has a fat content greater than or equal to 7% of the total weight of the dough.
49. (New) The biscuit produced by the method of claim 40.
50. (New) The biscuit of claim 49 wherein the amount of puroindoline is between 0.02 and 5% by weight relative to the weight of the flour.
51. (New) The method of claim 49 wherein the flour has a puroindoline content greater than 0.2% of the dry weight of the flour with the additional biscuit ingredients.
